Subject: Fwd: Disposal of Sediment Core Segments in Storage
[ATT00002.txt](#)

Mike,

If we wanted to dispose of sediment cores from the mercury treatability studies conducted earlier this year, do we need to get permission from EPA? If so, do I ask you?

Stan,

We continue to accrue charges for the sediment cores we have in frozen storage at the lab that were collected for the proposed mercury treatability studies. Can you check with Mike/EPA to determine if we can dispose of these cores together with the remaining core segments that are currently in the refrigerator (from the design support sampling). I can't think of any future use for either group of

cores.

Thanks, Jen
